1 Problem and Research Question

Which problem do you address with your research? Why is this important? What is the central research question and what do you want to find out? What knowledge do you expect to gain?

2 Related Work

What are the three most important works of other groups to which your research is related? How did these works influence you? What do you do better than existing works?

3 Methods

How do you conduct your research? Which methods do you use? How do you verify or evaluate your results?

4 Preliminary Results

Describe your preliminary results. Why should we trust these results? How did you check them?

5 Next Steps

What are the next steps in your work? What is missing before your work can become a dissertation?
